

Step 7 SQL query questions testing

Q1

The screenshot shows the SQL Editor interface with a query that calculates the total sales for each day of the week. The query is as follows:

```
10 SUM('total amount') AS total_sales
11 FROM dataset_retail_sales.retail_sales_dataset
12 GROUP BY 'product category'
13 ORDER BY total_sales;
14
15
16 SELECT
17     date_format(to_date(Date), 'EEEE') AS day_name,
18     SUM('Total Amount') AS total_sales
19 FROM dataset_retail_sales.retail_sales_dataset
20 GROUP BY day_name
21 ORDER BY total_sales DESC;
22
23 -- | expect
```

The results table shows the total sales for each day of the week:

day_name	total_sales
Saturday	78815
Monday	70250
Tuesday	69440
Friday	66290
Wednesday	58770

The interface also shows a sidebar with navigation options like Home, Workspace, Catalog, and SQL Editor. The bottom status bar indicates 7 rows and 0.85s runtime.

Q2

The screenshot shows the SQL Editor interface with a query that calculates the total sales for each month. The query is as follows:

```
22
23
24 SELECT
25     date_format(to_date(Date), 'MMMM') AS month_name,
26     SUM('Total Amount') AS total_sales
27 FROM dataset_retail_sales.retail_sales_dataset
28 GROUP BY month_name
29 ORDER BY total_sales DESC;
30
31
32 -- | expect
```

The results table shows the total sales for each month:

month_name	total_sales
May	53150
October	46580
December	44690
February	44060
January	36980

The interface also shows a sidebar with navigation options like Catalog, Jobs & Pipelines, Compute, and SQL Editor. The bottom status bar indicates 12 rows and 0.66s runtime.

Q3

The screenshot shows the SQL Editor interface with a query that calculates the total sales for each day of the week. The query is as follows:

```
10 SUM('total amount') AS total_sales
11 FROM dataset_retail_sales.retail_sales_dataset
12 GROUP BY 'product category'
13 ORDER BY total_sales;
14
15
16 SELECT
17     date_format(to_date(Date), 'EEEE') AS day_name,
18     SUM('Total Amount') AS total_sales
19 FROM dataset_retail_sales.retail_sales_dataset
20 GROUP BY day_name
21 ORDER BY total_sales DESC;
22
23 -- | expect
```

The results table shows the total sales for each day of the week:

day_name	total_sales
Saturday	78815
Monday	70250
Tuesday	69440
Friday	66290
Wednesday	58770

The interface also shows a sidebar with navigation options like Home, Workspace, Catalog, and SQL Editor. The bottom status bar indicates 7 rows and 0.85s runtime.
